

# PopView Tooltip Plugin for Confluence

## PopView Tooltip Plugin for Confluence

Tooltips plugin for Confluence.

Supports Confluence 3.5 - 6.X

30 Day Evaluation [Download](#) [Documentation](#) Buy

## What does it do?

Provides a tooltip-like quick text over any forward Confluence page link that is hovered over.

### Notes:

- Supersedes legacy Overlib plugin, which was made obsolete by Atlassian pre-Confluence 3.X.
- This plugin addresses logged issue [Atlassian JIRA DEVNET-279](#). The plugin is jQuery based with CSS formatting controls
- A pervasive usage of this plugin's functionality is seen at <http://www.alltop.com>. Hover over any link and see a summary of the forward-link.

## Online Demo

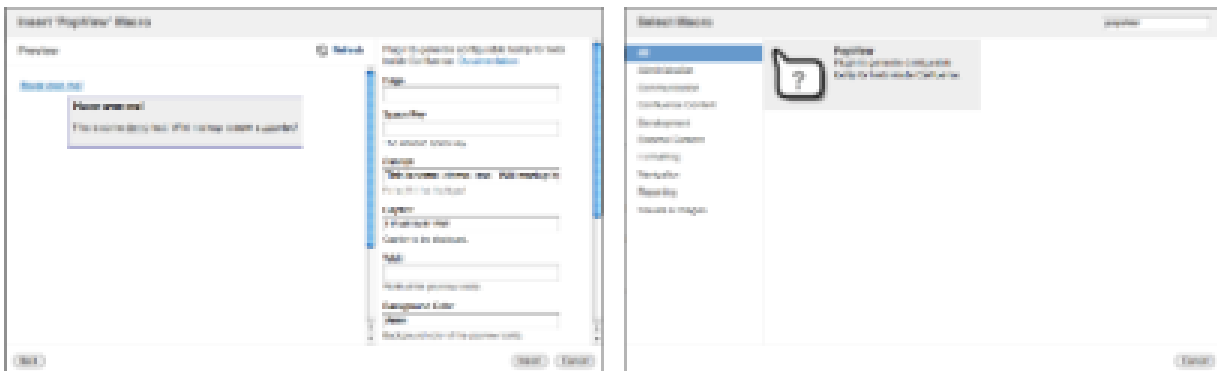

Hover your cursor over the following link; a "popview" abstract is shown of the linked-to page.

[Sneetches - Abdominal Stars](#)

The wiki code for this function is as follows:
