PopView Tooltip Plugin for Confluence

Tooltips plugin for Confluence.

Supports Confluence 3.5 - 6.X

30 Day Evaluation

What does it do?

Provides a tooltip-like quick text over any forward Confluence page link that is hovered over.

A pervasive usage of this plugin's functionality is seen at <http://www.alltop.com>. Hover over any link and see a summary of the forward-link.

Online Demo

Hover your cursor over the following link; a "popview" abstract is shown of the linked-to page.

[Sneetches - Abdominal Stars](#)

Screenshot

The fields below are inserted automatically when using Popview (based on the title and first sentence on page). If the tooltip text is not ideal, you can edit it by editing the macro in the page. You can also edit the caption and width of the tooltip.

Edit 'Popview' Macro
