NOV - DX Summit

November 12-14, 2018 >>>Chicago, Illinois

Gold Sponsor

CMSWire's DXSummit is a premiere event, annually in Chicago dedicated to modern digital experiences, most prominently customer experiences.

A CX spans many sides - from websites with embedded chat, to personalized customer portals for specific purposes (healthcare, banking, admissions - really there's unlimited scenarios), to IVR or contact center systems and operations, to back-office support systems of these and other related experiences, to suppliers and employee experiences that manage and respond to the experiences. The different viewpoints are all critical to best overall experiences, and the needs and requirements of the different audiences need to be holistically thought through.

From the AppFusions perspective, they are all "apps", they all drive interactions, metrics, events, and data, and when done right - the many technologies all work together in an integrated experience way.
