[\[Google Directory for Atlassian Confluence® \]](#) [\[What does it do? \]](#) [\[Video \]](#)

The Google Directory for Atlassian Confluence provides a searchable directory of your Google Directory user base, from Confluence, allowing for an embedded Enterprise Lookup Directory, fed by your Google domain accounts.

What does it do?

With the Google Directory, you get:

- A Google Directory-based Enterprise Directory table accessible from a new "Directory" menu item next to your site logo.
- Filtered and sortable table columns and searches
- Live links on displayed names to Confluence user profiles
- Lookup macro to embed a lookup search bar in any page
- Compatible with [Refined Wiki](#) and [Zen Foundation](#) themes, if installed.

Video

Similar to [Enterprise Directory and Org Chart](#) video, except with Google directory.

Note to self: create new video for Google Directory.
