

Jessie Curtner and Atlassian Summit 2010 - June 9-11

Very stoked about [Atlassian Summit 2010](#) coming up next week ...

Will be great to meet many Atlassian enthusiasts, developers, customers, partners, and indeed Atlassian-folks themselves!

Bound to be filled with surprises and invigorating discussions on all levels with a crowd like this. Four of us from AppFusions are attending, with smiles and excitement!

HOWEVER, before we even get there - I know one thing:

I'm already extremely thankful to the amazing Jessie Curtner - Atlassian's event coordinator extraordinaire!

This is my fourth official event (aside from user groups or such) that she has pulled together that I have attended:

- [AtlasCamp 2008](#)
- [AtlasCamp 2009](#)
- [Atlassian Summit 2009](#)
- and now [Atlassian Summit 2010](#)

So this is stated from experience and without hesitation!!

Truth be told, these events get bigger, more intense, and more complicated for her **I am sure** as each one evolves and grows - (just as Atlassian does :)) - so the challenges are not to be underestimated **at any level** in pulling off grand-scale top quality events for so many people flying in from all corners of the world.

Atlassian official events (AtlasCamp and AtlassianSummit) are top of the scale on excellence - certainly in accommodations, but more importantly in the quality people drawn that attend and the always upping-the-bar information shared.

Early Kudos Jessie and best wishes in the coming days during the event! You simply ROCK!

.. and I loved these recent tweets of yours! I'll be bringing you a big fat dark chocolate bar just in case!

I am officially on the "Summit" diet.
Which is I can't find time to eat.

Very excited about Atlassian Summit! Can't believe it's only 12 days away. I'm feeling surprisingly calm, which makes me nervous.

4:46 PM May 28th via web

Looking forward.
