

There's a lot to say about AppFusions

About AppFusions

Bridging technology, people and silos – since April 2010

AppFusions is a systems integrations company dedicated to building and mainstreaming integration bridges between best-of breed work systems. AppFusions believes it is logical and natural to expect these systems to cooperate together. Our [packaged integrations](#) solve many hard yet common "system cooperation" problems.

Bridges for efficiency

AppFusions builds integration solutions, *not just links*.

Our solutions are full-function platform-native user experiences/applications. They are use case driven, and designed for scale and deployment simplicity. Bridged systems allow you to:

- work more efficiently when you stop jumping between browsers and logins,
- stop duplicating data and content entry,
- stop storing files in multiple platforms or repositories,
- stop wrestling with incompatible import/export formats,
- continue a workflow from one system to the next, seamlessly (and many more scenarios).

In short, stop working harder, not smarter. Integrations allow you to get more done, faster.

AppFusions' integrations do not feel like integrations. The integrated "other system" becomes a first-class citizen in the host system. Everything feels native.

Confession: we are obsessed!

Ok, we admit: we are **obsessed** on what we do.

We want to enable, optimize, and grow system-to-system communications and collaborations everywhere. And we mean **everywhere!** In an organization, bridged systems increase engagement and smooth relationships, bringing together technologies, people, silos.

While we are always [pushing our experience](#) beyond any current day, our primary technical experience is [in the platforms](#) we have packaged solutions with:

- IBM Connections and Sametime
- Microsoft OneDrive, Office 365, OneDrive, Yammer...
- Box
- Dropbox
- Egnyte
- Alfresco
- GitHub
- New Relic
- Twitter
- Asana
- Google Drive, Google Analytics
- Atlassian systems (JIRA, Confluence,...)
- Salesforce
- WordPress
- Lingotek (Translations)
- Mixpanel
- UserVoice
- Doxygen
- Authentication and SSO (single sign-on) technologies like Kerberos, SAML2, Google, CAS, OAuth2

Supporting beyond...

Naturally our customers have unique network and system needs beyond integrations as well.

To date, AppFusions has prided itself in only retaining top-grade talent, both technically and with well-rounded communication skills. Our customers demand that, and we do not like to disappoint!

Our [professional services](#) offerings augment our products, covering all sides of enterprise deployment and network requirements: installations, configurations, architecture definition, data migrations, custom extensions, single sign-on, high availability, hosting, and anything else a customer needs with the technologies we work with.

AppFusions have been privileged to secure the trust of some of the most well-known corporations in the world: CA Technologies, AT&T, Neiman Marcus, Coca-Cola, Broadcom, Netflix, Pinterest, Amgen, Hubspot, Marketo, Seagate, HealthEdge, Cadence, and many more.

AppFusions can help you with:

- Any flavor integrations and migrations - and we mean any
- Standardize and/or integrate best-of-breed platforms and information
- Streamline IT management and support needs
- Adhere to protocols and standards, leveraging technology
- Optimize workflows across organization
- Optimize software development processes
- Cost management with custom development
- Implement solutions for highly-regulated industries

...and anything else.

Just try to break our back. Others have tried; it does not break easily, and has not broke yet! 😊

Beyond that...

Honestly, there's a whole lot more to say! We're moving fast!

Give us a shout!

We'd much rather chat and/or meet you in person than having you just reading about us here.

- [Email us](#)

- Meet to us at [@appfusions](#)

- +1 888.516.2890

We'll tell you more about us, and love to learn about you...

ONCE
YOU HAVE
EXPERIENCED
EXCELLENCE
YOU WILL
NEVER AGAIN
BE CONTENT WITH
MEDIOCRITY.
